COR™STAIN E80T5-B8

DESCRIPTION
COR™STAIN E80T5-B8 is an AISI 9%Cr-1%Mo steel flux cored wire designed for heat resistance. It was previously available as 505 FC.

APPLICATIONS
E80T5-B8 is used to weld chrome-moly pipe and tube, and other similar base materials. It is also used as an underlay for harder heat resisting filler metals.

PROCEDURE
E80T5-B8 is an air-hardening alloy: Maintain a preheat/interpass temperature of at least 350°F. Post heat according to base material. Recommended post heat is at 1575°F for one hour per inch thickness.
